Conference on Vortex Rings and Filaments in Classical and Quantum Systems (6-8 June), followed by: Workshop on New Experimental Techniques for the Study of Quantum Turbulence (9-10 June) | (smr 1661)

Contribution ID: 15 Type: not specified

Experimental investigation of the influence of background rotation on the dynamics and the stability of vortex rings

Tuesday, 7 June 2005 14:00 (0:35)

Content

Summary

Primary author(s): P.J. THOMAS ((University of Warwick, UK))

Presenter(s): P.J. THOMAS ((University of Warwick, UK))

Session Classification : Experimental investigation of the influence of background rotation on the

dynamics and the stability of vortex rings
