

Conference on Vortex Rings and Filaments in Classical and Quantum Systems (6-8 June), followed by: Workshop on New Experimental Techniques for the Study of Quantum Turbulence (9-10 June) | (smr 1661)

Contribution ID : 27

Type : not specified

Large-scale simulation of vortex ring instabilities and decay using a combination of vortex-in-cell and fast multipole methods

Wednesday, 8 June 2005 15:10 (0:35)

Content

Summary

Primary author(s) : R. COCLE ((Universit, Catholique de Louvaine, Belgium))

Presenter(s) : R. COCLE ((Universit, Catholique de Louvaine, Belgium))

Session Classification : Large-scale simulation of vortex ring instabilities and decay using a combination of vortex-in-cell and fast multipole methods
