

Conference on Vortex Rings and Filaments in Classical and Quantum Systems (6-8 June), followed by: Workshop on New Experimental Techniques for the Study of Quantum Turbulence (9-10 June) | (smr 1661)

Contribution ID : 36

Type : not specified

Materials and design techniques for sub-millimeter P and T sensors used at microkelvin temperatures

Friday, 10 June 2005 09:00 (0:45)

Content

Summary

Primary author(s) : G. IHAS ((University of Florida, Gainesville, USA))

Presenter(s) : G. IHAS ((University of Florida, Gainesville, USA))

Session Classification : Materials and design techniques for sub-millimeter P and T sensors used at microkelvin temperatures
