

International Symposium on the Jahn-Teller Effects: Novel Aspects in
Orbital Physics and Vibronic Dynamics of Molecules and Crystals | (smr
1768)

Contribution ID : 8

Type : not specified

Jahn-Teller d9 ions in non-cubic materials: Different geometry of Cu²⁺ and Ni⁺ in layered perovskites

Monday, 28 August 2006 16:20 (0:30)

Content

Summary

Primary author(s) : M. MORENO (Dept. de Ciencias de la Tierra y Física de la Materia Condensada, Univ. de Cantabria, Spain)

Presenter(s) : M. MORENO (Dept. de Ciencias de la Tierra y Física de la Materia Condensada, Univ. de Cantabria, Spain)

Session Classification : Jahn-Teller d9 ions in non-cubic materials: Different geometry of Cu²⁺ and Ni⁺ in layered perovskites
