

International Symposium on the Jahn-Teller Effects: Novel Aspects in
Orbital Physics and Vibronic Dynamics of Molecules and Crystals | (smr
1768)

Contribution ID : 1

Type : **not specified**

From single to bi-polarons with Jahn-Teller character and metallic cluster-stripes in hole doped cuprates

Monday, 28 August 2006 10:00 (0:40)

Content

Summary

Primary author(s) : K. A. MÜLLER (Univ. of Zurich, Switzerland)

Presenter(s) : K. A. MÜLLER (Univ. of Zurich, Switzerland)

Session Classification : From single to bi-polarons with Jahn-Teller character and metallic cluster-stripes in hole doped cuprates
