

International Symposium on the Jahn-Teller Effects: Novel Aspects in
Orbital Physics and Vibronic Dynamics of Molecules and Crystals | (smr
1768)

Contribution ID : 21

Type : not specified

**Conical intersections, their analogue for metastable
electronic states, and bound molecular states
embedded in the continuum**

Wednesday, 30 August 2006 08:50 (0:40)

Content

Summary

Primary author(s) : L. S. CEDERBAUM (Theoretische Chemie, Univ. Heidelberg, Germany)

Presenter(s) : L. S. CEDERBAUM (Theoretische Chemie, Univ. Heidelberg, Germany)

Session Classification : Conical intersections, their analogue for metastable electronic states, and bound molecular states embedded in the continuum
