

International Symposium on the Jahn-Teller Effects: Novel Aspects in
Orbital Physics and Vibronic Dynamics of Molecules and Crystals | (smr
1768)

Contribution ID : 2

Type : **not specified**

Persistent current around small polarons embedded in spin density wave order

Monday, 28 August 2006 11:00 (0:30)

Content

Summary

Primary author(s) : H. KOIZUMI (Inst. of Materials Science, Univ. of Tsukuba, Japan)

Presenter(s) : H. KOIZUMI (Inst. of Materials Science, Univ. of Tsukuba, Japan)

Session Classification : Persistent current around small polarons embedded in spin density wave order
