## 13th International Workshop on Computational Physics and Materials Science: Total Energy and Force Methods | (smr 1824)

Contribution ID: 11 Type: not specified

## Electron-Phonon interaction with electron and lattice Wannier functions and superconductivity in Boron-doped diamond

Thursday, 11 January 2007 12:30 (0:20)

Content

Summary

Primary author(s): FELICIANO GIUSTINO (University of California @ Berkeley, USA)

Presenter(s): FELICIANO GIUSTINO (University of California @ Berkeley, USA)

**Session Classification**: Electron-Phonon interaction with electron and lattice Wannier functions and superconductivity in Boron-doped diamond
