

Kondo effect and spin correlation in single InAs self-assembled quantum dots with nanogap electrodes of normal, superconducting and ferromagnetic metal

Monday, 4 June 2007 10:40 (1:00)

Content

Summary

Primary author(s) : S. TARUCHA (Univ. of Tokyo)

Presenter(s) : S. TARUCHA (Univ. of Tokyo)

Session Classification : Kondo effect and spin correlation in single InAs self-assembled quantum dots with nanogap electrodes of normal, superconducting and ferromagnetic metal
