

Conference on Structure and Dynamics in Soft Matter and Biomolecules:  
From Single Molecules to Ensembles | (smr 1845)

Contribution ID : 18

Type : **not specified**

**Proline and glycine control protein self-organization  
into elastomeric or amyloid fibrils**

*Wednesday, 6 June 2007 11:45 (0:45)*

**Content**

**Summary**

**Primary author(s) :** R. POMES (University of Toronto, Canada)

**Presenter(s) :** R. POMES (University of Toronto, Canada)

**Session Classification :** Proline and glycine control protein self-organization into elastomeric or amyloid fibrils
