

Solid-state dye-sensitized solar cells: device operation, optimization, charge generation mechanism and novel electrodes structured from diblock copolymers

Tuesday, 28 October 2008 14:00 (0:40)

Content

Summary

Primary author(s) : HENRY SNAITH (University of Oxford, U.K.)

Presenter(s) : HENRY SNAITH (University of Oxford, U.K.)

Session Classification : Solid-state dye-sensitized solar cells: device operation, optimization, charge generation mechanism and novel electrodes structured from diblock copolymers
