

Awards for Mid-Career Researcher Excellence

The International Liquid Crystal Society Announces Two New Awards for Mid-Career Researcher Excellence

Two new awards for excellence in liquid crystal research and technology will be awarded to two finalists for his/her work's cumulative impact on the field of liquid crystals. Eligible candidates must be between 10-25 years beyond their PhD degree. The Mid-Career Award Guidelines and procedures for these awards are in a draft stage, but they will be found here: <http://www.ilcsoc.org/midcareer.html>

Two companies at the forefront of the liquid crystal display revolution, namely, Samsung Electronics Corporation and LG Displays of South Korea, are the generous sponsors of these awards. The awards are respectively named "Award" and "**Samsung**" and "**LG Display**" Awards. One each of these awards will be bestowed upon the finalists at every International LC Conference beginning with the 22nd ILCC in Jeju Island, Korea. The ILCS Award Committee, chaired by Professor Helen Gleeson, will issue a formal invite for nominations.

Sincerely,
Satyendra Kumar
President
International Liquid Crystal Society
