

First-principles studies of single-molecule junction conductance: Links, length, and switching

Friday, 9 January 2009 11:30 (0:35)

Content

Summary

Primary author(s) : JEFF NEATON (Molecular Foundry, LBNL, Berkeley, USA)

Presenter(s) : JEFF NEATON (Molecular Foundry, LBNL, Berkeley, USA)

Session Classification : First-principles studies of single-molecule junction conductance: Links, length, and switching
