

The Abdus Salam International Centre for Theoretical Physics (ICTP), in collaboration with the Asia Pacific Center for Theoretical Physics (APCTP) and the Italian Institute for Nuclear Physics (INFN), will hold a

SCHOOL and WORKSHOP on **D-BRANE INSTANTONS,** WALL CROSSING and MICROSTATE COUNTING

15 - 21 November 2010

Miramare, Trieste, Italy

TOPICS:

- **D-Brane Instantons**
- Wall Crossing
- **Entropy Enigmas**
- **Precision counting**
- **Black Holes and Attractors**
- **Black Holes in AdS**

The Aim of the activity is to provide pedagogical treatment of these subjects in the form of a series of lectures by individual speakers. The activity is intended for theoretical physicists or mathematicians with knowledge of quantum field theory, general relativity and string theory.

PARTICIPATION

Scientists and students from all countries which are members of the United Nations, UNESCO or IAEA may attend the School. As it will be conducted in English, participants should have an adequate working knowledge of this language. Although the main purpose of the Centre is to help research workers from developing countries, through a programme of training activities within a framework of international cooperation, students and post-doctoral scientists from advanced countries are also welcome to attend.

As a rule, travel and subsistence expenses of the participants should be borne by the home institution. Every effort should be made by candidates to secure support for their fare (or at least half-fare). However, limited funds are available for some participants who are nationals of, and working in, a developing country, and who are not more than 45 years old. Such support is available only for those who attend the entire activity. There is no registration fee to be paid.

HOW TO APPLY FOR PARTICIPATION
