

Double occupancy as a universal probe for antiferromagnetic correlations and entropy in cold fermions on optical lattices

Wednesday, 8 June 2011 12:10 (0:25)

Content

Summary

Primary author(s) : N. BLUEMER (Johannes Gutenberg-Universität, Germany)

Presenter(s) : N. BLUEMER (Johannes Gutenberg-Universität, Germany)

Session Classification : Double occupancy as a universal probe for antiferromagnetic correlations and entropy in cold fermions on optical lattices
