

## Participants' talks

*Thursday, 11 December 2014 16:00 (1:00)*

### Content

16:00 Stephane Deny (et al) – A flexible code: the retina dynamically reallocates its resources to code for complex motion

16:15 Luca Mazzucato (et al) – Stimuli quench the dimensionality of the neural representation

16:30 Tiziano D'Albis – On the amplification of spatial grids in a recurrent neural network

16:45 Mojtaba Madadi Asl – How delay modifies the outcome of the Spike-Timing-Dependent Plasticity (STDP)

### Summary

**Session Classification :** not yet classified
