CLIVAR-ICTP Workshop on Decadal Climate Variability and Predictability | (smr 2716)

Wednesday 18 November 2015

Session 4: Pacific Decadal Climate Variability - Chair: Mat Collins - Leonardo Building - Budinich Lecture Hall (08:30-14:30)

time	title	presenter
08:30	Coral Records of IPO and ENSO Variability in the South Pacific: New Results from the Expanding Coral Network	BRAD LINSLEY
08:50	Observed strengthening of the Walker Circulation and limitations of CMIP5 models	SCOTT POWER
09:10	The Pacific Decadal Oscillation revisited	MATT NEWMAN
09:30	Estimating the continental response to global warming using pattern-scaled sea surface temperatures and sea ice	PAUL KUSHNER
09:50	Pacific inter-decadal variability driven by tropical-extratropical interactions	RICCARDO FARNETI
10:05	Effects of volcanism on tropical modes of variability	NICOLA MAHER
10:30	Coffee Break	
11:00	Tropical oceans drive hemispheric hydroclimate patterns during North American mega- drought	SLOAN COATS
11:20	Influence of 21st Century climate change on internal atmospheric variability and precipitation predictability over the Southwestern US	NIKOLAUS BUENNING
11:30	Studying interdecadal Pacific variability using a perfect model framework	SIMON BORLACE
11:45	Discussion Session	
12:30	BUFFET LUNCH (at the back of the cafeteria)
