AGRA II

Aritmética, Grupos y Análisis

An ICTP-CIMPA Research School

8 - 22 August 2015

Univ. S. Antonio Abad, Cusco, Peru

The theme of the school is number theory and related topics, including areas within combinatorics and group theory.

Funding is available.

The conference will be held in Spanish. Scientists and students from all countries which are members of the United Nations, UNESCO or IAEA may attend the school. All are welcome.

Primary audience: graduate students and young researchers

Courses:

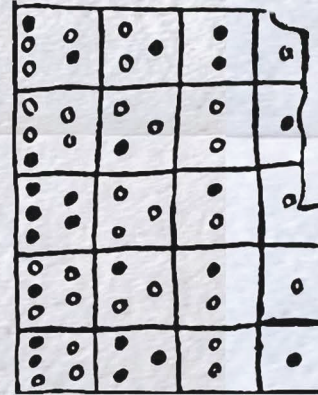

Modular forms: constructions and applications

Additive combinatorics

Zeta functions and L-functions in geometry

Harmonic analysis and number theory

Groups and expanders
